WORK HISTORY

Acturis   **May 2018–Present**

Technical Business Analyst

I work within a team focused on the maintenance and development of the core Acturis system. My responsibilities include:

- Developing PL/SQL packages and procedures and database design

- Designing software solutions to address client requirements

- Writing technical specifications for code updates

- Solving technical problems by analysing the Acturis database and reading back end C++ code

- Training and supervision of Junior Technical Business Analysts

Tutorful   **Jan 2018–May 2018**

Private Tutor

I provided one-to-one tuition in maths and physics to A-level students.

Blueprint Partnership   **Aug 2017–Oct 2017**

Research Executive

I worked on a fixed term contract within this pharmaceutical market research agency. I created presentations for the dissemination of research findings.

EDUCATION

University of Manchester   **2013–2017**

MPhys (Hons) Physics

Grade: 2.1

- Key modules: Introduction to Computing for Physicists (80%), Object-Oriented Programming in C++ (71%)

- MPhys Project (73%): I used Unix shell scripting to remotely edit files and run simulations. The results were analysed using Matlab.

- Other activities: Water Polo Team Captain. I organised training, matches and transport.

Independent Study   **2011–2012**
- A Level: Maths (A*), Further Maths (A*), Physics (A)

The Judd School   **2003–2010**
- A Level: Maths (A), Biology (A), Chemistry (A)

- AS Level: Physics (A)

SKILLS

- Oracle PL/SQL and SQL

- Git and Version Control

- Python
